**July 7, 2010**

**Daleville, Ind.** - Sherry Laboratories, which proudly serves the needs of United States based defense clients, announces the company's Northern Materials Laboratory in Daleville is ITAR compliant and registered with the Defense Trade Control expiring May 31, 2011.

As an ITAR registered company, Sherry Northern Materials has met the requirements for compliance to participate in a variety of military, defense, aerospace and homeland security projects. ITAR registration and compliance is a noteworthy achievement and supplements the laboratory's solid breadth of accreditations including Nadcap and A2LA (The American Association for Laboratory Accreditation), as well as approvals from some of the world's largest manufacturers including Bell Helicopter, Boeing, Bombardier, Cessna, Federal Mogul, General Electric Aviation, Gulfstream Aerospace and Rolls Royce.

"Since our inception more than 60 years ago, Sherry has a long history of serving the defense and aerospace markets," said Mel Barnell, Senior Vice President of Technology and Quality. "Our registration as an ITAR laboratory demonstrates our commitment to serving homeland security and defense clients by providing them a highly secure environment for sensitive data. We are proud to provide such an integral support service to those protecting our country both at home and abroad."

### **About Sherry Laboratories**

Sherry Laboratories provides independent and uniquely accredited materials, environmental, food, microbiological and petrochemical testing services, engineering expertise, technical services and products of the highest quality in a cost-effective and timely manner for the success of our clients. Sherry is organized as a network of eight testing laboratories located in Indiana, Oklahoma and Louisiana, serving customers throughout the United States and the world.
