

In the oilfield

For a refinery

In response to an emergency

Quality Counts

Whether you are developing new products or wanting to prove the quality and ecological compliance of others, Sherry Laboratories can help you achieve your goals. The unique ability of our Lafayette, La., facility to perform toxicity and analytical testing under one roof can simplify your search for a testing partner.

The data we generate will help you prove your marketing claims, give you an advantage in your marketing efforts or even obtain inclusion on the NCP Product Schedule, if that is your goal. Whether your product is new or existing, Sherry Laboratories stands ready to serve your testing needs.

you an advantage in your marketing efforts or even obtain inclusion on the NCP Product Schedule, if that is your goal. Whether your product is new or existing, Sherry Laboratories stands ready to serve your testing needs.
